

Mississauga Transitway Now Complete With Official Opening Of Renforth Station

MISSISSAUGA: Renforth Station, part of the Mississauga Transitway, was officially opened on Monday by all three levels of government. With the final station now open, the completed Transitway will continue to make east-west travel across Mississauga faster and more convenient for commuters in the region.

Steven Del Duca, Minister of Transportation; Navdeep Bains, Minister of Innovation, Science and Economic Development and Member of Parliament for Mississauga-Malton, on behalf of the Amarjeet Sohi, Minister of Infrastructure and Communities; Bonnie Crombie, Mayor of Mississauga and Peter Zuk, Chief Capital Officer of Metrolinx, were at Renforth Station to officially open the new bus station and mark the completion of the transitway.

Steven Del Duc said: "Renforth Station is the final bus station to open along the Mississauga Transitway, and marks the completion of the project. Commuters can access GO Transit, MiWay and TTC local bus service from this station, helping them get to where they need to go quickly and conveniently.

"This is one more way that our government is delivering on the commitment to provide better quality of life for commuters and

residents by investing in the transit and transportation system that they deserve."

Renforth Station is the eastern-most stop of the 18-kilometre Mississauga Transitway and provides commuters with consistent travel times, better access to GO Transit, MiWay, and the Toronto Transit Commission (TTC), and provides a service connection to Toronto Pearson International Airport. The station includes:

- Heated shelters
- Public washrooms
- Bus platforms with ticket vending machines
- Information boards and elevators.

The Mississauga Transitway project is funded through a joint partnership between all three levels of government. The Government of Canada has contributed up to \$83 million to the project through the Canada Strategic Infrastructure Fund. The Province of Ontario has provided \$113 million towards the project which includes investment in GO Transit assets related to the transitway. The City of Mississauga and the Province of Ontario funded the remaining project costs.

Stay Clear Of Dams And Power Stations This Holiday Season

TORONTO: - Ontario Power Generation (OPG) has reminded the public to stay safe this holiday season by obeying all warning signs, fencing and booms near its hydroelectric stations and dams.

"The holiday season is always a great time to get together with family, friends and loved ones, so let's keep it safe," warns Mike Martelli, OPG's President Renewable Generation. "Stay away from rivers and dams. The changing currents and flows near our stations mean that if ice starts to form it will be thin and not safe for recreation."

OPG's dams and stations are often controlled hundreds of kilometres away. Water flow and currents can change rapidly and without TORONTO, Dec. 20, 2017 / CNW/ - Ontario Power Generation (OPG) is reminding the public to stay safe this holiday season by obeying all warning signs, fencing and booms near its hydroelectric stations and dams.

"The holiday season is always a great time to get together with family, friends and loved ones, so let's keep it safe," warns Mike Martelli, OPG's President Renewable Generation. "Stay away from rivers and dams. The changing currents and flows near our stations mean that if ice starts to form it will be thin and not safe for recreation."

OPG's dams and stations are often controlled hundreds of kilometres away. Water flow and currents can change rapidly and without warning. If you are enjoying the outdoors over the holidays stay clear and stay safe.

For information about water safety, please visit www.opg.com/watersafety.

OPG generates safe, clean, reliable, low-cost power for Ontario. More than 99 per cent of this power is free of smog and carbon emissions. OPG's power is priced 40 per cent lower than other generators, which helps moderate customer bills.
