

# Saleen Relaunches S7, Will Only Build Seven Units!

Saleen Automotive, Inc. has reasserted its dominance in the supercar market with the unveiling of the 1300-horsepower Saleen S7 Le Mans (LM) Edition at the recent LA Auto Show.

The S7R race version has won at every major racetrack in the world, including Daytona, Sebring, Nurburgring, and the prestigious 24 Hours of Le Mans. The S7 LM Edition commemorates that seven-year run of consecutive racing victories of its Saleen S7 Supercar. The S7 street version has also starred in several Hollywood blockbusters, including being driven by "God" in Bruce Almighty.

Steve Saleen previously announced the planned build of this extraordinary supercar. The car unveiled at the recent LA Auto Show is the fulfillment of the first of the special edition S7 LMs. "True to our form, we are bringing back America's only true supercar," said Steve Saleen, CEO of Saleen Automotive. "We are celebrating our winning heritage and advancing the performance DNA that Saleen was built around."

A 7.0L twin-turbo engine, rated at 1300 horsepower, will power the new S7 LM supercar. Each one is being hand built at Saleen's Corona, CA, headquarters. The S7 LM's transmission is a longitudinal, 6-speed all synchromesh with limited-slip differential. It also has a metallic clutch with 8.0-inch twin-disc hydraulic actuation bow-through uprights.

The S7 LM has an all-new, ex-

clusive Black/Silver paint scheme with clear-coated carbon fiber. It will ride on Saleen forged, five-spoke, Le Mans-style wheel design equipped with center locking wheel nuts with automatic safety locks.

Fronts are sized at 19 X 9.5-inches with rears at 20 X 12.0-inches. These sleek, stylish wheels will be shod with high-performance tires: 275/30/ZR19

front and 335/30/ZR20 rears.

The chassis is comprised of 4130 Lightweight Steel Space frame with Honeycomb Composite panels.

The S7 LM has advanced wind tunnel developed aerodynamics including integrated split-channel airflow throughout the car, full underside aerodynamics, advanced-design front tray and side skirts, full-body-width rear spoiler, and

heat-rejecting tinted glass.

The S7 LM is well equipped with safety features including, but not limited to, integrated roll protection, aluminum honeycomb impact-absorbing panels, 3-point seat belts with automatic pre-tensioner, and aluminum honeycomb front crash structure with integrated rear crumple zones.

Interior convenience and comfort treatments feature a high-vol-

ume flow-through ventilation system, A/C, rear view video camera with interior LCD display, 240 MPH speedometer, race-inspired central-mounted digital tachometer with S7R-style shift lights, fully adjustable tilt and telescoping steering column, power windows and door locks, keyless remote for doors and rear trunk, variable intermittent windshield wipers, electric heated front windshield, remote engine hatch and fuel filler door releases, and the latest in sound systems.

Standard interior trim includes black Alcantara with multi-tone leather and suede. The S7 LM is also equipped with performance sport seating, aluminum and color accents, custom-fitted driver seating position, and a dual leather and Alcantara suede steering wheel. Also included is the special LM-edition trim.

The Saleen S7 LM is priced at (US)\$1,000,000,000. With a mere seven in production, this is the ultimate collector supercar.

## Ten Simple DIY Tips To Keep Your Car In Top Shape

Even if you're not the handy type, there are simple things you can do to keep your car in top shape all winter long.

1. Do what you can. Get acquainted with your vehicle owner's manual to see what needs to be done and when, even if you won't be doing the job yourself.

2. Pay attention to warning lights. Early intervention can prevent expensive repairs and breakdowns.

3. Focus on items that will keep your vehicle safe to oper-

ate, such as the brakes. Regularly check your brakes' fluid levels and warning lights, and watch for signs of wear.

4. Checking the level of your antifreeze/coolant may deliver the best return on your effort. It's easy to do and can help prevent some of the costliest engine repairs. Simply look under the hood for the coolant reservoir; the correct level will be visible from the outside the tank. Top up if necessary.

5. Keep product choice simple.

Facing a full retailer's shelf and not knowing what to buy can be intimidating. Stay safe by opting for trusted brands with long track records. When it comes to performance chemicals like brake fluid

and antifreeze/coolant, Prestone products deliver proven protection that is easy to choose.

6. Properly inflated tires are safer and will save you money at the pumps, so keep an eye on your tire pressure.

7. Use smartphone apps to keep track of your maintenance schedule and get reminders for when it's time to for oil and filter changes and fluid/belt service.

8. There's no need to purchase vehicle-specific formulations of coolant and many other products

for every car in your home, simplifying your choice and saving you money.

9. Changing your windshield wipers is quick and inexpensive — simply follow the instructions on your owner's manual.

10. Double check that your headlights and brake lights work. Limited visibility during shorter days and snow and ice storms means you need to do everything you can to make sure other cars can see you at all times. - www.newscanada.com
