

FordPass

INNOVATION FOR ALL

*New Launch of the FordPass™ 2.0
Built with a user first mind-set.*

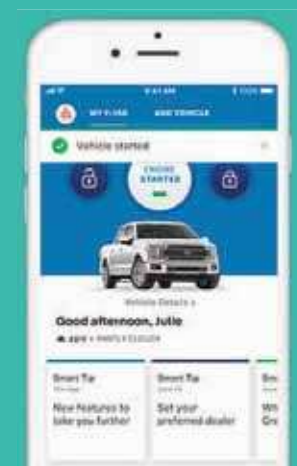

FordPass™ 2.0 Making your journey easier

With the power of FordPass™ 2.0 on your smartphone you can be in touch with your vehicle in more advanced ways. Enjoy the convenience of locating and contacting your preferred dealer through FordPass™ 2.0 on your mobile device. FordPass™ 2.0 is designed to provide members with information about their vehicle up front with suggested next actions in a consolidated view.

Vehicle Controls

FordPass™ 2.0 lets you connect to your vehicle like never before. With a SYNC® Connect-equipped 2018 F-150, Fusion, Escape, Expedition, Explorer, Mustang or EcoSport, you can unlock, start your vehicle and even check your fuel level with just a tap. Plus, have your vehicle ready to go by scheduling it to start automatically.

My Vehicles

When you add your vehicle to the app, you can access its information and service history right from your phone. Get Vehicle Health Alerts and service reminders when your vehicle needs attention.

Vehicle Health Alerts are push notifications via the FordPass triggered when a vehicle's warning light goes on related to low fuel, washer fluid, TPMS and checkengine lights. The notification provides more information on what is happening and what the user's next step actions should be.

Find

FUEL

Find the fuel you need to keep going. Filter by fuel grade or brand and quickly compare pricing.

SMART PARKING

Say goodbye to circling the block. With FordPass™ 2.0 you can search for parking, view parking prices before you even leave the house and save your favourite spots for future use.

FordGuides

FordGuides are always happy to help you with any FordPass™ 2.0 needs or questions you may have.
